

# ELIXIR

BRAKES by AVID

**A PERFECT MIX OF POWER, CONTROL AND A BIT OF AVID MOJO. JUST WHAT EVERY RIDE BEGS FOR.**

Downhill. Uphill. Across the hill. Around the hill, or flying over the hill. Your ride always benefits from predictable, powerful performance from your brakes. That's what Elixir is all about. We've taken the know-how behind the world's winningest hydraulic brakes (Juicy of course), and given the design and technology a slap in the butt. The result is sleek, totally fresh, very light, more powerful and it delivers the most amazing progressive modulation ever—thanks to TaperBore Technology™. Ring, ring. That's your ride calling. It says it wants Elixir.

# ELIXIR<sup>R</sup>

TAPERBORE TECHNOLOGY

## EXCEPTIONAL RIDE QUALITY

Avid's new Taperbore Technology\* and improved pivot location provide supreme control. Less initial power and deep stroke modulation allow the rider to better manage and use the increased overall power. The power gain comes from Elixir's larger caliper pistons making the power sit halfway between Juicy and Code. Elixir benefits include reduced weight and clearance through reservoir design and optimized caliper.

## Features

- Taperbore Lever with Integrated Reservoir
- Tool-Free Reach Adjust
- Two-Piece Caliper - Top Loading Pads
- Improved Modulation
- Increased Power
- Reduced Weight
- Drip-Free Bleeding
- MatchMaker Compatible

## Technologies

- Taperbore
- Integrated Reservoir
- Power Reserve Geometry
- Caliper Positioning System

### SPECIFICATIONS

Pads	Sintered
Caliper	Two Piece
Fluid	DOT 5.1
Rotor Size	160 / 185 / 203
Weight Target <sup>o</sup>	375 grams (Front post-mount 160mm)
Application	XC / Trail / AM / FR / DH
System	Two Piston; Open System
Color	Mercury Silver Body / Tungsten Grey Lever / Mercury Silver Caliper
MSRP	\$129.00 USD per wheel / 160mm rotor

\* Patent Pending

<sup>o</sup> Specification subject to change.
