

MAXLE LITE

-40%

A Light weight Maxle that preserves the sturdy 20 x 110mm standard!

For Model Year 2009 RockShox has refined it's Maxle and optimized it for weight, while still providing the same great stiffness for which 20 x 110mm standard has been known. Maxle Lite is over 50 grams or 40% lighter than the RockShox Maxle, yet maintains equivalent durability and functionality. Even better, it uses the industry standard 20 x110mm dimension, meaning it's compatible with products on the market today.

MAXLE LITE

- 84 grams
- Thinner aluminum axle body
- Lighter and new ergonomic lever
- Aluminum skewer
- 20 x 110mm → Bigger is still better
